The Risk-Based Approach - Factoring in the Results of the NRA

THE NRA - 5 REASONS WHY YOU SHOULD READ IT

It is a health check of the country and of the sector you belong to.

It can lead to a reconsideration of one's business model and strategy.

It can guide internal remediation exercises and implementation of new controls.

It provides a direction as to the areas that your supervisor is going to focus on.

It is an obligation at law ... but be selfish and do it for your own good and safety.

The NRA & the Risk Based Approach

What ML/TF risks is the subject person exposed to?

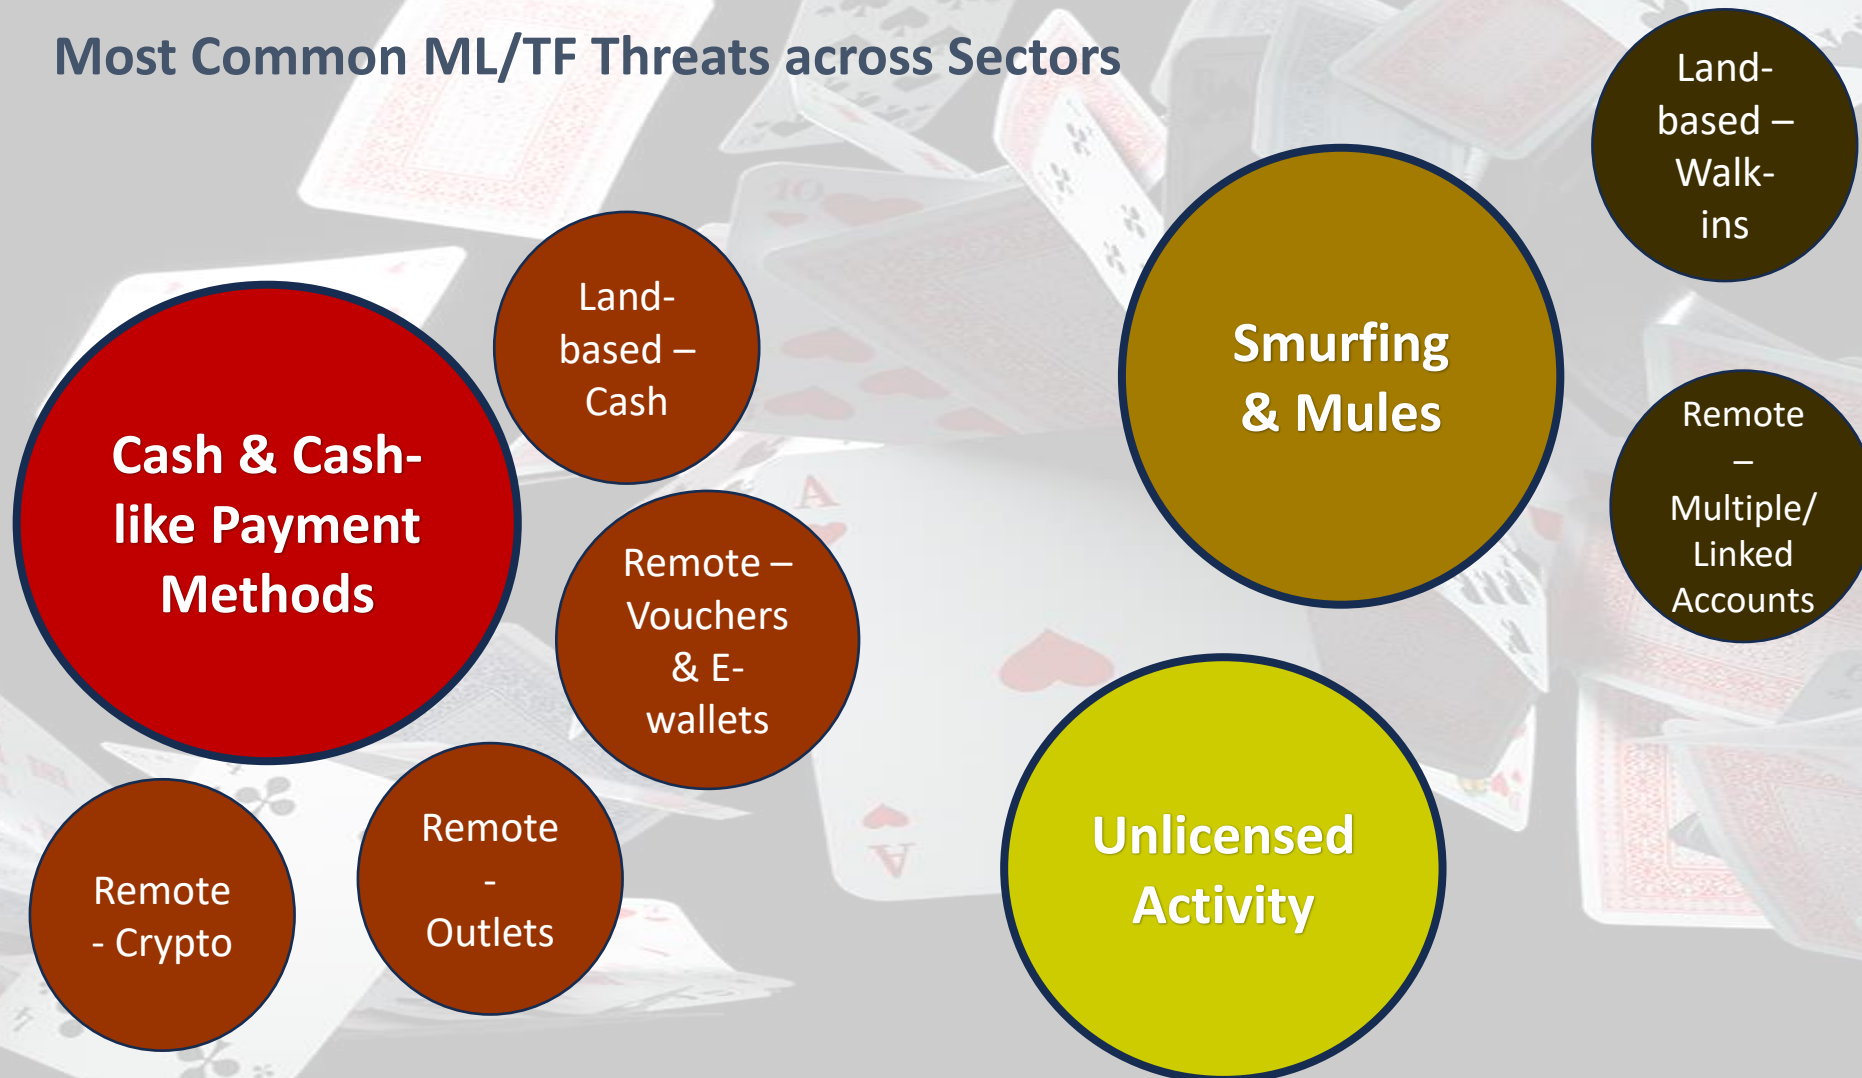

- Customer Risk
- Product, Service & Transaction Risk
- Geographical Risk
- Interface Risk
- Other Risks

Are the mitigating measures preventing and/or detecting these risks?

What additional mitigating measures is the subject person to implement?
What questions is it to ask its customers?

What are the FIAU Expectations?

- **The publication of the NRA is a trigger event - do undertake a review of your own BRA and related mitigating measures.**
- **No expectations that the BRA and any changes to the mitigating measures will be carried out in a few days.**
- **If you are subject to a supervisory engagement show us that you are working on the review.**
- **If you want to diverge from the assessment in the NRA, document your reasons and make sure they are valid ones.**
- **Hold information/training sessions for your directors, top management and interested officers and employees.**
- **Don't generalise – make use of sub-categories and avoid de-risking ...**
and treat TF separately from ML.
